OUT AFTER UTAH SHIPMENTS.

Big Plants Can Handle 17,000 Sheep a Day and Want Utah and Idaho Mutton.

H. W. Prickett, traffic manager for the Kansas City Stock Yards company, who has been in Salt Lake for a few days past, this morning announced that he had appointed W. J. Ridd as the representative of the company to purchase shipments of sheep and cattle in Utah and contiguous territory.

Mr. Ridd ought to fill the bill, for during the years he was connected with the Rio Grande Western in the capacity of traveling passenger agent he created a large circle of acquaintances in every city and hamlet in this state. Then he went into Idaho and Nevada on live stock business, and during the past season he loaded wool for the

The Kansas City Steek Yards com-pany of Missouri owns and operates eight large packing houses and is said to be the largest stocker and feeder in the world.

In the face of the fact that the Los Angeles market has entered the field hot and strong for Utah sheep and cat-tle, Mr. Prickett now proposes to strain every nerve to get in on the ground floor. He states that the firm wants much larger shipments from Utah and Idaho than ever before. While the supply from this state is considerable, the Gem state is not furnishing nearly so many as could be desired. Taken all in all, he says, the company is receiving from Utah and Idaho only about onethird as much mutton as it can dispose of daily. The capacity of the plants is 17,000 sheep per day.

### SUIT AGAINST SAN PEDRO. Olivia M. Starmer Claims Trains Are Wrecking Her Dwelling.

Olivia M. Starmer filed suit in the court today against the Pedro, Los Angeles & Salt Lake Rail-road company to recover damages in the sum of \$3,000 for injuries alleged to have been caused to plaintiff's home by reason of the operation of trains over defendant's tracks in close proximity to the property mentioned, which is located on west South Temple street. It is claimed that the running of the trains jars plaintiff's house so that the foundation and brickwork are falling away, and that the smoke and dust thrown out by the engines have penetrated plaintiff's house and caused great damage to her furniture, render-ing it unfit for occupancy.

Cananea, Yaqui River & Pacific railway from Alamos, Mexico, through Mazatlan and down to Tepic and San Marios, would soon be completed. The ex-tension is being hurried because of the determination on the part of Harriman to open up this country as a freight feeder of the Southern Pacific.

The extension of the Harriman lines now reaches from Guaymas to Alamos, The distance to Mazatlan is 75 miles, The roadbed on this section has been partly completed and will not take many months to fluish.

The country surrounding Mazatlan, Alamos, San Marcos and Teple promises to become a big freight district of the Southern Pacific. Most of the Importations for this section are shipped to Manzacillo or Mazatlan and carried

Through not re-alizing the power of a lie, the people of Utah have allowed the blackest kind of a lie cicud to be gathered, which now hangs over them like a pall. Uncle Sam Teaching the Arts of War to Regulars and Guardsmen Alike.

## GOOD FOR UTAH BOYS TO READ

First Military Camp Established at Mt. Gretna, Where Military Problems are Worked Out.

(Special to the "News.") Camp Roosevelt, Mt. Gretna, Penn., Aug. 25 .- Uncle Sam is making here his first experiment in teaching the arts of war to regulars and state militia together on the vast plane of actual campaigning.

Maneuver camps are nothing new, either here or abroad. But Camp Roosevelt is more than a maneuver camp It is a camp of instruction as well, It is a gathering of federal troops and national guardsmen from various states on an equal footing to be taught problems of war, not merely to par-ticipate in spectacular battles with blank cartridges. In this respect it is a departure from the methods hitherto undertaken at military encamp-ments in the United States and in foreign countries as well. It is a step far in advance of any that has ever been taken heretofore by the armies

of the world. The selection of a camp site for the department of the east was the all important question that confronted the war department when Congress authorized this instruction camp. With-out much hesitation it was decided to ry Mt. Gretna as an experiment, with a view to selecting a permanent camp. Pennsylvania has for several years held its annual encampments here. Mt. Gretna is half a night's ride from

New York City, headquarters of the department of the east. It is located the Cornwall and Lebanon railroad which traverses the beautiful Levalley of Pennsylvania. steps from the train and gets the first glimpse of the camp through the dense foliage of great white oaks and chest-

AN IDEAL BATTLE GROUND.

As far as the eye can see the beautiother like great terraces, are dotted with tents of khaki brown, or canvas white. Regimental flags here and there mark the headquarters of regulars and national guards alike. Far over these camp grounds of the infantry, are the long lines of horses on a slope below the cavalry and artillery quarters. Just above these on the summit of another great terrace-like hill the signal corps and engineers are encamped, and from the top of a giant oak tree comes the chatter of the wireless telegraph, used here for the first time in the signal

Away above all is the highest point of the camp where Gen. Frederick Dent Grant and his staff are quartered. From his threshold, he can sweep the entire camp with field glasses, Gen. Grant at camp headquarters

'This is a camp of instruction,' he said, "and is the first we have ever had that brought troops of the regular army and the state troops together to learn real warfare. "There have been, and are now man-

euver camps in the country, but they are not camps of instruction in the sense I mean. We take up the advanced drills here, going just beyond what troops in garrison are supposed to learn, and then we make a progressive drill lasting one week, each phase leading to another phase, what may be termed a campaign, and ending on Friday in a problem, which must be met and fought out by the opposing forces which we call the blues' and the 'browns.'

These forces are distinguished by blue shirts and the others their brown blouses. The settlement of the problem at the end of the week, whether it be a sham battle five or six miles from camp, or whether it be a midnight attack upon the camp itself, is what may be termed a maneuver. The progressive drill during the week leading up to the problem or maneuver, covers field service regulations, involves all phases of field instruction, and is in the end what might be termed a cam-

GRANT PRAISES MT. GRETNA "In many respects," continued General Grant, "Mt. Gretna is an ideal spot as this has been pitched. One needs but to look at the rolling hills shaded as they are here and there by great oaks and chestnuts to see that from topographical standpoint we have here a perfect place. The water runs of by as perfect a system of natural drainage as anybody could desire. That is in my opinion, a great advantage.

"For all lines of instruction we are admirably located here at Mt. Gretna. The ground is fashioned by nature for a camping place in regard to the pitch-ing of tents and fitting up the settlements generally. It is much better to be in a rolling country like this, than to be on a wide-stretching plain, or to be in a wild, mountainous coun-When General Grant was directed to

When General Grant was directed to bring out troops from the various garrisons and forts in his department, and gather them at Mi, Gretna, he marched the infantry the first 200 miles of its journey and then the rest of the way by train. The cavalry and artillery marched 300 miles of the journey before boarding trains for the Pennsylvania camp.

Here was something new in the way of going from garrison to garrison, and it served to reveal the fact that the United States soldiers are "soft," many of them falling out of line on the long marches. Many borses also gave out. Nothing could have been more beneficial than these cross-country march-es, for they showed that garrison life American forts and barracks does keep the individual soldier suffiently hardened to make a long march Hereafter there will be many such Atlanta tramps for the regulars.

Another reason why Mt. Gretna was adopted was because of its excellent health record. Never has there been its history as a military camp. Camp Roosevelt has been in operation about a month, and has been attended by from 3,000 to 4,000 regulars permanenttroops who make weekly stays there, and there has been not one case of

question of the cost of transportation herefore, is a very important consideration, particularly as the appropriation by Congress is insufficient to de-fray all the expense and the states have to pay a part of the transportaion of their troops over long distances. This was one consideration that led to the choice of Mt. Gretna, centrally cated as it is and with ample trans-

fever scourge at Mt. Gretna in all and by from 6,000 to 8,000 state serious illness in the hospital.
